SUMMARY

Computer Science Engineering student and React Front-End Developer with hands-on experience building responsive web applications using React.js, JavaScript, HTML, and CSS. Experienced in component-based development, responsive interfaces, dashboard applications, and translating UI designs into functional web experiences.

EDUCATION

St. Martin's Engineering College <i>B.Tech in Computer Science and Engineering, CGPA: 8.5/10</i>	2023 – 2027
New Chaitanya Junior College <i>Intermediate (10+2), 94.9%</i>	2021 – 2023

WORK EXPERIENCE

Niltech Edu Web Technologies Intern	Feb 2024
- Worked with HTML, CSS, JavaScript, and responsive web development concepts through practical development tasks. - Strengthened front-end development, debugging, and responsive design skills.	
Skyscanner – Forage Front-End Software Engineering Job Simulation	Jun 2026
- Developed a Backpack React web application using component-based architecture. - Applied React.js best practices to build reusable components and maintain scalable front-end code.	

TECHNICAL SKILLS

Programming:	JavaScript (ES6+), Python, SQL, Object-Oriented Programming
Frontend:	React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design
Development:	Component-Based Architecture, REST APIs, Debugging, Problem Solving
Tools:	Git, GitHub, Vite, npm, VS Code
UI/UX:	Figma, Wireframing, Prototyping, Design Systems

PROJECTS

SkillBridge Learning Dashboard	React.js, TypeScript, UI/UX
- Designed and developed a responsive learning dashboard with modular cards, progress views, and structured content sections. - Built reusable React/TypeScript components and applied UI/UX principles to maintain consistent layouts and interactions. - Implemented responsive layouts and reusable design patterns for consistent desktop and mobile experiences.	
SmartAI Chat Interface	React, Web Development
- Built a responsive AI chat interface with structured conversation views, input controls, and mobile-friendly navigation. - Developed reusable React components and responsive layouts to maintain a consistent chat experience across devices. - Packaged the web application into a standalone Android APK for usage outside the browser.	
DataViz Dashboard	React.js, JavaScript, HTML5, CSS3
- Developed an interactive data visualization dashboard with charts, filters, structured data views, and export functionality. - Built reusable frontend components to organize and present data through a responsive dashboard interface. - Focused on clear data presentation, responsive design, and consistent user experience across screen sizes.	
Developer Portfolio Website	React.js, JavaScript, HTML5, CSS3
- Designed and developed a recruiter-focused portfolio to showcase UI/UX case studies, React projects, skills, and certifications. - Implemented responsive layouts, structured navigation, project sections, and reusable UI components for desktop and mobile. - Deployed the portfolio using GitHub Pages and maintained project links for recruiter access.	

CERTIFICATIONS

- Advanced React – Meta
- Web Development with HTML, CSS, JavaScript – IBM
- Fundamentals of UI/UX Design – Microsoft
- Claude 101 – Anthropic
